Humanities

Victoria

Pearson Humanities Victoria 7–10

Engaging students of all levels

A new series designed to support Victorian students and teachers with comprehensive curriculum coverage of history, geography, economics and business, civics and citizenship. It's been created to engage and captivate students of all levels as they learn about humanities, to help them reach their full study potential.

Student Book

A visually engaging spread-based design, with each chapter featuring images, illustrations, infographics and source materials to engage and captivate all learners. The **student book** includes self-contained toolkit chapters for each discipline, covering key concepts and skills. All core chapters are supported by additional worksheets, solutions, teaching strategies, instructional rubrics, chapter tests and online interactives.

Lightbook Starter

We know you want to check the readiness of your students and keep track of their progress. With **Lightbook Starter**, you get an innovative digital learning and assessment resource that prepares students and assesses them against outcomes. It's all about helping you guide your students and helping them take control of their learning.

Student Reader+

Reader+ is our next generation eBook. Students can read, take notes, save bookmarks and more—anywhere, anytime. Integrated resources and interactive activities enhance and extend the learning experience, helping to engage students, and give them choice and flexibility in their learning.

Teacher Reader+

Teacher Reader+ aids lesson preparation by combining student book page references with a wealth of teacher support to help you meet the demands of the Victorian Curriculum for humanities.

As the world's learning company, we're inspired by the way education changes lives. We're creating innovative products and services to help all learners stay on the path to a better education.

SECTION 1

HISTORY

1 History toolkit 1

- 1.1 What is history? 2
- 1.2 Introducing historical sources 3
- 1.3 Historical thinking 6
- 1.4 Chronology 8
- 1.5 Historical sources as evidence 9
- 1.6 Continuity and change 11
- 1.7 Cause and effect 12
- 1.8 Historical significance 14
- 1.9 The contribution of archaeology 15

2 The Vikings 17

- Timeline 18
- 2.1 The Viking world 20
- 2.2 Everyday life in Viking society 24
- 2.3 The Norse gods and religion 28
- 2.4 Viking expansion 30
- 2.5 Viking conquest 34
- 2.6 Viking rule over England and its decline 38
- 2.7 Significant individuals 40
- 2.8 The Viking legacy 44

H1 Medieval Europe DIGITAL ONLY 1

- Timeline 2
- H1.1 The medieval European world 4
- H1.2 Everyday life 6
- H1.3 The Crusades 10
- H1.4 Crime and punishment 14
- H1.5 Military and defence systems 16
- H1.6 Origins and spread of the Black Death 18
- H1.7 The causes of the Black Death 22
- H1.8 Treatments for, and responses to, the Black Death 24
- H1.9 The impact of the plague 26
- H1.10 Significant individuals 30
- H1.11 The influence of the medieval European world 32

H2 The Ottoman Empire DIGITAL ONLY 1

- Timeline 2
- H2.1 The growth of the Ottoman Empire 4
- H2.2 Key features of the empire 6
- H2.3 Everyday life 10
- H2.4 Architecture and art 12
- H2.5 An expanding empire 16
- H2.6 A tolerant society 20
- H2.7 The strength and influence of the empire 22

3 Japan under the shoguns 47

- Timeline 48
- 3.1 Japan before the shoguns 50
- 3.2 The origins of the shogunate 52
- 3.3 The unification of Japan 54
- 3.4 Political and social features of Tokugawa Japan 56
- 3.5 Cultural features of Tokugawa society 60
- 3.6 Everyday life in Tokugawa society and economic features 62
- 3.7 Control of foreign trade 64
- 3.8 Land use under the Tokugawa 66
- 3.9 The decline and the legacy of the Tokugawa shogunate 68
- 3.10 A significant individual 70

H3 Angkor/Khmer Empire DIGITAL ONLY 1

- Timeline 2
- H3.1 Jayavarman II and the founding of the Khmer Empire 4
- H3.2 Key social groups 8
- H3.3 Daily life 12
- H3.4 Power, wealth and trade in Angkor 16
- H3.5 Cultural achievements: Temples 19
- H3.6 Religion 24
- H3.7 Water management in Angkor 26
- H3.8 The decline of Angkor 28
- H3.9 The significance of Angkor 30

Be skilled

Each **skills builder** outlines a subject-specific method or technique for students to master; they are instructive and self-contained, and step students through key skills to prepare and build student fluency and application. **Toolkit chapters** for each discipline cover key concepts and skills from the Victorian Curriculum and are tailored for Level 8. There are also additional graphic organisers and useful templates available for students via the Student Reader+.

4.7 Legacy of the Renaissance

New discoveries, thoughts and ideas

The Renaissance was a period of rebirth of art, culture and thought and the impetus for new discoveries. The Italian Renaissance influenced the culture, literature, politics and religion of Europe.

Culture

Invention was born during the Renaissance period and had an impact on many areas, including education, art, architecture and science. Many of the greatest artists and philosophers created during the Renaissance, often sponsored by rich patrons who allowed them to concentrate on their creativity. Many of the works created during this period are still regarded as among the most significant and influential of all time.

Politics

There was also an emphasis on diplomacy involving a focus on building cooperative and peaceful relationships with other countries through negotiation and trade. New ideas were developed or adapted during the period of the Renaissance in the Italian region of the city in which government was run. Changes from the medieval feudal structure towards a more inclusive type of governance.

The Renaissance in England

The Renaissance did not reach England until the late 15th century and reached its height there during the reign of Queen Elizabeth I (1558–1603), especially in music and literature.

The availability of the printing press at this time meant that Greek and Latin classics were available to a wider range of people and began to be translated into English. Among the many writers of this period in English literature were William Shakespeare, Christopher Marlowe, Ben Jonson and John Donne.

A wide range of musical styles and genres developed in England. The English madrigal, a form of the madrigal, was popular. Other composers of the period were Thomas Tallis and William Byrd.

100 The Monarchmaker and the Wild Duck painter Marcus van Meerveldt, 15th century. Marcus van Meerveldt was a Dutch painter who lived in the Netherlands.

Economics

The Renaissance was a period of rebirth of art, culture and thought and the impetus for new discoveries. The Italian Renaissance influenced the culture, literature, politics and religion of Europe.

Culture

Invention was born during the Renaissance period and had an impact on many areas, including education, art, architecture and science. 100 The Monarchmaker and the Wild Duck painter Marcus van Meerveldt, 15th century. Marcus van Meerveldt was a Dutch painter who lived in the Netherlands.

The Reformation

The Reformation, which began in 1517, is one of the most important events of the Renaissance period. It was a movement that led to the development of new ideas and the challenge of the Catholic Church.

Origins

Theologian, or scholar of religion, criticised the Catholic Church for many reasons. They argued against its excessive power, the indulgence system and the corruption of the clergy and the hierarchy of the church. Theologian of Wittenberg University, set up his own church in 1517. His ideas were to spread throughout Europe and to spread against the Catholic Church.

Marlin Luther

Marlin Luther is a German monk who was a theologian of Wittenberg University, set up his own church in 1517. His ideas were to spread throughout Europe and to spread against the Catholic Church.

100 A stained glass window of Martin Luther.

Skills builder

Understanding chronology

An understanding of chronology means that you can put events in order of time. You are required to do this in a number of ways in the text to which they happen. It can also be useful to know what happened in other parts of the world at the same time.

1. Look at the timeline at the beginning of this chapter. Can you add three more events that happened in Italy between 1287 and 1507?

2. Choose three important events that happened in England between 1287 and 1507.

3. Create your own timeline.

- Create a timeline of your life starting with the year in which you were born.
- For every year of your life the text has an event that happened somewhere in the world and add it to your timeline.

Activities

Remembering and understanding

1. List the four areas of society that have been affected by the Reformation.
2. How is the power of the Reformation linked to the Renaissance?

Applying and analysing

1. Create a concept map explaining the impact of the Renaissance and the Reformation on the world.
2. Explain the connection between the Renaissance and the Reformation.
3. Describe the impact of the Renaissance on the world.
4. What might be learnt by examining such a concept?

Be extended

The **case study** units relate to a specific event or location, and are written to extend students' knowledge and understanding. The **spotlight** boxes focus their attention on a place, an issue or a concept relating to the unit; they are designed to develop students' knowledge and understanding of the ideas and processes that are central to the Level 8 study of the humanities. The **in the field** units in the geography section provide a step-by-step guide to undertaking and evaluating fieldwork; they have been written as a guide and are not tied to a specific location, so they can be used with fieldwork studies the class is undertaking.

9.6 Indigenous Australians

The traditional Indigenous Way of life

Aboriginal and Torres Strait Islander people have successfully lived throughout Australia. Indigenous people lived in shelter, houses and villages before the arrival of white settlers. They developed villages over a season food source and lived in them for the year. For example, in western Victoria, Indigenous people built houses over wells with roofs for living in and a water source. The houses were built a complex system of ways to survive to each.

Movement across the land

Aboriginal people were strong swimmers and gatherers who moved across their traditional lands, but were not considered to be nomadic. They had a deep knowledge of their environment that, in most areas, they could obtain sufficient food and law resources for their children and themselves in just a few days. They were excellent observers of the conditions of their country and would move on when resources showed signs of being used.

The areas in which Indigenous people moved across the land was determined by how much food they could produce. This was related to population density over the centuries. In the inland areas, where there was plenty of food and water, they might spend months to years in one location and rarely move on. In the coastal areas, they had to walk long distances between waterholes and food sources, which were spread over a much wider range.

Indigenous people also moved across the land to take advantage of seasonal foods and resources. They followed the breeding and movement of animals and fish, as well as the cycles of flowering and fruiting plants. That knowledge of such regular patterns was very deep and had been built up over thousands of years of observation.

Ceremonies, social exchange and trade

There were several important events that took place in the lives of Indigenous people. These included ceremonies of special significance. Aboriginal people were expert hunters and gatherers. They used their knowledge and skills to trade, exchange and barter goods. They traded on the regular basis and were able to trade over a wide area. They traded on the regular basis and were able to trade over a wide area. They traded on the regular basis and were able to trade over a wide area.

Mobility of Indigenous people today

Indigenous people are highly mobile, as is shown in Figure 9.2. This trend is the result of a number of factors, including education, employment, health care and more. There has been a small amount of migration from remote areas to cities. Despite this mobility there remains a strong attachment to the land and kin (family).

100 The most common destination for Indigenous people in Australia.

The significance of place

Indigenous people are very attached to the place in which they or their ancestors were born. Many are very conscious of their own local history, possessing a detailed knowledge of its geography and natural history. They retain family names and memories of their country, which links to significant events. In the main area, they did not just move physically from one place to another, but they moved their hearts and minds.

Maintaining kin relationships

The kinship system is central to Aboriginal social organisation. It is maintained by kinship ties, such as marriage and family. Family name are not used but are passed on to children. The kinship system is central to Aboriginal social organisation. It is maintained by kinship ties, such as marriage and family. Family name are not used but are passed on to children.

CASE STUDY

Indigenous people with an oral tradition

Indigenous people with an oral tradition, such as a written language, have a long history of oral tradition. They have a long history of oral tradition. They have a long history of oral tradition. They have a long history of oral tradition.

100 A reflection on Aboriginal people in central Australia, from a remote community, and the impact of the drought in northern South Australia, 1970–71. (Adapted from the South Australian Museum, No. 30, pp. 41–42)

Activities

Remembering and understanding

1. Explain how Aboriginal people were able to live off the land over much of the Australian continent.
2. Describe how Indigenous people used their knowledge of the land to survive.
3. Explain why Indigenous people are so mobile today.

Applying and analysing

1. Study Figure 9.2. Describe the pattern of movement between remote and urban areas.

Evaluating and creating

1. Investigate how Indigenous people have been affected by European settlement.
2. Using a map of Australia, label and describe the sources of water and the land.
3. Explain how the water was gathered.
4. What did the Aboriginal people use to store the water?
5. Where does the water now come from?

100

Be progressed

The student book **activities** reinforce key understandings and extend students beyond the text by involving them in a variety of learning experiences; they are crafted using Bloom's taxonomy to cater for the full range of learning abilities to move learners towards what they are expected to know and to help them consolidate that knowledge. Many of the activities are based on the stimulus material presented in the chapters, to facilitate the development of the skills.

There are handy icons in the student book to indicate the best time for students to engage with the corresponding **Lightbook Starter** assessment module. These formative assessment modules link back to overview questions at the start of the chapter.

4.4 Science and technology

Understanding the world

People embraced new sources of knowledge and created a new period of thinking during the Renaissance. They began to understand the world around them. Studies of the world and how it worked led to a new period of thinking during the Renaissance. They began to understand the world around them. Studies of the world and how it worked led to a new period of thinking during the Renaissance.

Activities

Remembering and understanding

1. Define the term 'scientific principle'.
2. Explain why the emergence of the printing press was significant.

Applying and analysing

1. Imagine that you are able to travel back in time to witness one of the accidents or inventions of the Renaissance.
2. Write a list of the questions that you would like to ask.

Lightbook Starter

The **Lightbook Starter** is a cutting-edge **formative** and **summative** assessment platform, containing **complementary sets of questions** for reviewing the student book's units and chapters. These digital questions serve as an alternative or additional assessment opportunity for students who enjoy the benefits of **instant feedback**, **hints** and **auto-correction**.

Students and teachers can enjoy the visibility of learning through a progress tracker that shows each student's achievement against selected curriculum learning outcomes.

Be ready

The **before you begin** section includes useful preparatory material and questions to **activate** the **prior knowledge** of students and to establish their knowledge baselines. In addition, the expected **learning outcomes** present the key knowledge of the chapter in a student-friendly manner.

Be assessed

A variety of **interactive question types** with **hints** and **solutions** help students to check their understanding of what they are learning; these tools provide scaffolding and guidance to students so that they can confidently attempt review questions in class or at home. The module reviews are useful as a revision device to help students identify their areas of weakness or as a **formative assessment** to inform teachers in their lesson planning. The Lightbook Starter can also be used by students to check their understanding throughout the chapter; students benefit from the Lightbook Starter's **auto-corrected** responses that re-teach key concepts and provide them with instant feedback.

Be in control

The Lightbook Starter enables teachers and students to use a digital assessment tool as an alternative or addition to the questions in the student book. The Lightbook Starter's structure mirrors the overview questions on each chapter opening of the student book so that it provides a **fully integrated approach to digital assessment** and feedback.

Be reflective

An integrated set of **reflection** questions support students in considering their progress and future areas for focus. Students are frequently prompted to reflect on what they've learnt, and how they've worked.

Be tracked

Students can enjoy seeing progress through the learning outcomes that are updated instantly in the **progress tracker**; the progress tracker **teacher dashboard** shows where the learners are in their learning and is mapped to Victorian Curriculum content descriptors.

Teacher Reader+

The **Teacher Reader+** makes lesson preparation easy by combining additional teaching strategies and ideas for class activities along with differentiation and EAL/D support. Suggested solutions are also included, as well as all the answers to the student book activities.

Be prepared

The **chapter resource summary** for each chapter provides an easy reference point and overview for teachers; there are also categorised activity references for each student book unit to help make tailored lesson planning easier. Full **answers**, including suggested alternative solutions, to all the activities are also supplied. Further, each unit's **learning objectives** are clearly stated.

Be differentiated

The **differentiated rich task worksheets** help learners to increase their fluency in using specific skills and to demonstrate their understanding of key concepts. The rich tasks are differentiated along three complexity levels to support different entry points for students. There is an accompanying **rubric** for each task that teachers can give students upfront to more explicitly define their goals.

Be supported

The **teacher guide** offers a range of ideas to introduce students to each new topic, as well as to spark and activate their prior knowledge in the subject area. There are also skills continuum rubrics for each discipline. Further, students can be encouraged to track their progression on the continuum throughout their learning.

Be report-ready

Students' understanding can be tested by using the ready-made **Lightbook Starter chapter assessment**. This **summative assessment** can be assigned by teachers; alternatively, teachers can use the **printable and editable chapter test** format available via the Teacher Reader+.

Student Reader+

Reader+ is our next generation eBook. Students can read, take notes, save bookmarks and more—anywhere, anytime.

Be equipped

Integrated resources and interactive activities enhance and extend the learning experience, helping to engage students, and give them choice and flexibility in their learning.
