Unit 3 How do fields explain motion and electricity?

AREA OF STUDY 1

How do things move without contact?

Key knowledge 2

Worksheets

Worksheet 1	Electric field lines	12
Worksheet 2	Magnetic fields	13
Worksheet 3	Making it magnetic—fields and coils	15
Worksheet 4	Deflecting electrons	16
Worksheet 5	Force and current	18
Worksheet 6	Looking for particles	20
Worksheet 7	Millikan's oil-drop experiment	22
Worksheet 8	Forces in electric fields	24
Worksheet 9	Gravitational fields	26
Worksheet 10	Working with orbits	27

Practical activities

Activity 1	Charge and electric field	30
Activity 2	Mapping electrical fields	33
Activity 3	A current-carrying conductor in a uniform magnetic field	38
Activity 4	Magnetic field of a coil	42
Activity 5	Gravitational acceleration	47

AREA OF STUDY 2

How are fields used to move electrical energy?

Key knowledge 50

Worksheets

Worksheet 11	Checking up on charges	54
Worksheet 12	The motor effect	56
Worksheet 13	Inducing an emf	58
Worksheet 14	Back to motors and generators	59
Worksheet 15	Small-scale power transmission	61
Worksheet 16	Understanding electromagnetism	63

Practical activities

Activity 6	Electromagnetic induction—the direction of the induced current in a wire	64
Activity 7	Electricity from a DC motor	66
Activity 8	Faraday's law of electromagnetic induction	68
Activity 9	Transformer operation	73
Activity 10	Electric power—issues in supply and distribution	78

AREA OF STUDY 3

How fast can things go?

Key knowledge 82

Worksheets

Worksheet 17	Kinematics and dynamics	91
Worksheet 18	Projectile motion—is it safe?	93
Worksheet 19	Projectile motion—human cannonball data analysis	94
Worksheet 20	Going around corners	97
Worksheet 21	Circular motion and gravity	99
Worksheet 22	Swinging pendulum	101
Worksheet 23	Hooke's law—data analysis	102
Worksheet 24	Special relativity and muons	103
Worksheet 25	It's all relative—special relativity	104

Practical activities

Activity 11	Projectile motion—an introduction	107
Activity 12	Projectile motion—the effect of launch angle on range	110
Activity 13	Circular motion—centripetal force in a horizontal plane	115
Activity 14	Circular motion—centripetal force in a vertical plane	119

Contents

Unit 4 How can two contradictory models explain both light and matter?

AREA OF STUDY 1

How can waves explain the behaviour of light?

Key knowledge 122

Worksheets

Worksheet 26	Waves and light	131
Worksheet 27	Waves around us	132
Worksheet 28	Interpreting graphs of waves	134
Worksheet 29	Communicating is critical	135
Worksheet 30	Diffraction and interference	137

Practical activities

Activity 15	Waves in slinkies and ropes	141
Activity 16	Dispersion and refraction	144
Activity 17	Measuring the speed of light	147

AREA OF STUDY 2

How are light and matter similar?

Key knowledge 150

Worksheets

Worksheet 31	Light and matter	156
Worksheet 32	The photoelectric effect	158
Worksheet 33	Matter waves	160
Worksheet 34	Quantum mechanical atom	162
Worksheet 35	Evidence for the wave model of light	164
Worksheet 36	Investigating spectra	165

Practical activities

Activity 18	Testing for unknowns	167
Activity 19	Light and spectra	169
Activity 20	Photoelectric effect	172

AREA OF STUDY 3

Practical investigation

Key knowledge 176

Worksheets

Worksheet 37	Developing a physics vocabulary	178
Worksheet 38	Elements of a practical investigation	179
Poster	How can the width of a hair be measured?	180
